EVIS LUCERA ELITE GASTROINTESTINAL VIDEOSCOPE

Slim scope and improved operability with optical magnification

EVIS LUCERA ELITE GASTROINTESTINAL VIDEOSCOPE

Main Features

Slim Optical Magnification Scope

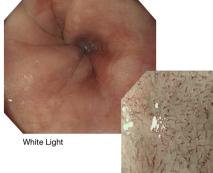

While adopting an optical magnification function, the GIF-H290Z achieves 9.9-mm distal end outer diameter, which is 0.9 mm slimmer than the previous GIF-H260Z*1 scope. This helps to support smoother insertion.

Optical 85x Magnification

This scope magnifies images by 85x^{*2}, with its HDTV image quality delivering close views of the mucosal surface easily. In combination with the brighter NBI (Narrow Band Imaging), mucosal tissue and capillary networks are enhanced, further supporting detailed observation.

Water Jet

A forward water jet helps to keep the mucosa clear during observation and treatment in the upper Gl tract.

Waterproof One-touch Connector

The connector design minimizes the effort required for setup prior to and in between cases. In addition, it is fully submersible and eliminates the need for a water-resistant cap and the associated risk of an

expensive repair due to accidental immersion.
